

## Transfer Leads From Your Website to QFloors Flooring Software

QLeads is a new and invaluable tool! This innovative program takes leads from external sources (like your company website or other lead generators), stores them, and then populates them into your QFloors Leads screen.

### SAVE TIME AND DROPPED BALLS

No need to re-enter leads gained through your website and other external websites. They are uploaded via QLeads to your QFloors system.

### TRACK TRENDS AND PERFORMANCE

The many tracking reports that our QFloors Leads screen provides can give you helpful insight and direction.

### SHARE AND INTEGRATE INFORMATION

QLeads facilitates the easy flow of information between your QFloors system and your website (or other external sites).

### TRAILBLAZING INNOVATION

QLeads is breaking new ground. As websites become more and more important in lead generation, QLeads will help you stay ahead of the game.
